Sixty years ago, computers were enormous. They were also expensive and slow. Now computers are getting smaller and cheaper and this will continue. We'll probably use computers in different ways in the future. We'll use them in cars, too. We use some computers in planes now, but in the future we probably won't need people to fly them. A computer will be able to fly a plane by itself. In the future, computers might design machines by themselves, without the help of people.
