Questions

Question1: put each of the following concepts in its right place to get the correct answer:

(Homepage – static – interactive – webpage – websites)

1. ....an electronic document published on the internet ,to be viewed through the internet browser programs.
2. .... the main page of website ,through which is going for the rest of webpages.
3. Visit the .... through a computer or mobile phone.
4. ....webpage displays content allows visitors to interact with them and deal with them.

Question2: choose the correct answer:

1. Use of HTML, commands as well as other languages such as JavaScript and PHP in the design of .... Webpages.
    (Homepage – website – interactive).
2. ....is a webpage or more linked together under the given name.

    (Homepage-website – interactive)

3. .... The main page of a website, through which is going for the rest of the webpages.

    (Homepage-website – interactive)

4. Use of HTML commands in the design of ....

    (web page elements – website – static webpages)

1

Computer department

5. ....webpage consists of a set of images, text, audio, video clips and hyperlinks.

(web page elements – website – static webpages)

6. Using a programming language and HTML commands are:
   a. Planning to build the site.
   b. Webpage design of the site
   c. The preparation and processing webpages.
   d. None of the above.

7. Planning to build a website means:
   a. Drawing a simple sketch on paper for the pages of the site.
   b. The design of the form of the main pages.
   c. Determine the hyperlinks inside the main page.
   d. All of the above.

8. Determine the hyperlinks inside the main page and the pages of the site in stage :
   a. Implementation of webpages
   b. Publishing
   c. Web page design of the site
   d. Planning to build the site.

9. .... is the first stage of design and create a website.
   a. Implementation of webpages
   b. Publishing
   c. Web page design of the site
   d. Planning to build the site.

10. .... is the last stage of design and create a website.
   a. Implementation of webpages
   b. Publishing
   c. Web page design of the site

Computer department

d. Planning to build the site.

11. ………………………… display information to view only.
    a. Interactive webpages
    b.   static webpages
    c. webpages
    d.   website.

12. …………………… An electronic document published on the internet to be viewed through the internet browser programs.
    a. Interactive webpages
    b. static webpages
    c. webpages
    d. website.

13. ……………………………… is a webpage or more linked together under the given name.
    a. Interactive webpages
    b. Website
    c. webpage
    d. static webpages

14. The use of HTML commands and other languages such as Java script and PHP in the design of:
    a. webpage elements
    b. website
    c. static webpage
    d. interactive webpage.

15. …………………are images , text , audio , video clips and hyperlinks.
    a. webpage elements
    b. website
    c. Interactive webpage.

3

d. static web page

16. Audacity software which is used to create and process sound is characterized by:

a. free software , open source

b. runs on windows operating system , Linux.

c. Easy interface in the deal.

d. All the above.

17. To download (running) program:

a. Click on start menu.

b. Select audacity

c. (A),(B)

d. None of the above

18. To cut audio clip :

a. Select cut from edit menu.

b. Select cut from file menu.

c. Select view from edit menu.

d. None of the above

19. You must first retrieve the files to the .... to be able to drop them to the timeline.

(project files – layers – function tabs)

20. Tracks resemble the ....

(project files – layers – function tabs)

21. ....is used to move between project files (image files ,sound files).

(project files – layers – function tabs)

22. To add an effect on video scene , click on the ....
(name - effect tab – function tab)

4

23.   To read .... Of the effect, point your mouse on effect symbol.

                      (name - effect tab – remove effect)

24.   When choosing a slice clip, show the following options............
   a. keep both sides
   b. keep left side
   c. keep right side
   d. all the above

25.   to delete the added effect on scene the video, right click on the effect icon, and select ....
   e. name
   f. effect tab
   g. remove effect

Question3: put (√) or (x) :

1. Website is an electronic document published on the internet, to be viewed through the internet browser programs.   (   )
2. Home page is a webpage or more linked together under the given name.   (   )
3. Webpage elements are a set of images. Text . audio .video clips and hyperlinks.   (   )
4. Interactive webpage content remains constant doesn't change and web page content is written by the page designer.   (   )
5. You can visit the website through a computer or mobile phone.(   )
6. The stage of implementation is the last stage of design and create a website.
7. We can prepare the images using a digital camera or mobile.   (   )

5

8. Convert the design into webpage are in the preparation and processing of webpages stage.   (   )

9. Planning to build the site is the second stage of design and create a website.   (   )

10. Planning to build a website that requires a sketch on paper for the site's home page and the rest of the pages of the site .   (   )

11. Planning for build the site requires collecting data and information contained in each webpages.   (   )

12. Create hyperlinks between webpages are in the planning to build the site of webpages stage.   (   )

13. Programs of creating and processing audio files ,contain set of tools that enable the user to create audio files is easy.   (   )

14. To create a text file we need sound processing program. (   )

15. Audio file (mp3) is inappropriate for publication via websites.(   )

16. Audio programs doesn't allow the addition of different effects on audio clips. (   )

17. (jpg, gif , bmp , png) are the extention of audio files.   (   )

18. To see the remaining pages of the website click on hyperlink.(   )

19. http://www.openshot.org is a correct URL to download the openshot program.   (   )

20. You can save the audio file from the edit menu. (   )

21. Internet browser is a program to display webpages.   (   )

22. Openshot is free closed source software. (   )

23. Movie maker software is used to process video files, works through the operating system Linux   (   )

24.   To stop recording the sound in the Audacity program click on the (stop) button.   (   )

Computer department

25. Openshot program works through the operating system windows and Linux.   (   )
26. Audio clip is a set of fixed shots, when passes quickly , create a certain sense of visual movement.(   )
27.   Video clip is a set of fixed shots, when passes quickly, create a certain sense of visual movement.(   )

Question 4: Re-arrange the next stages to design and create a website:

(   ) web page design of the site

(   ) preparation and processing of webpages

(   ) planning to build the site

(   ) the website publishing online

(   ) the stages of implementation of webpages.

Question 5 : Find the different word:

1. Home page – webpage – windows
2. Website – file – edit
3. Static webpages – effect – interactive webpage
4. WAV – hyperlink – MP3
5. Delete – amplify – echo

Question 6 : complete the following from between brackets:

(WAV – delete – effect – file – MP3 – cut – Audacity)

1. .... software is characterized by the possibility of direct recording of the voice inside.
2. To delete an audio clip , select the sound clip to be deleted then press .... On keyboard.

Computer department

3. Audio file extension (................), compact size (small storage.
4. Audio file extention (...............) a high quality and purity.
5. To transfer a sound clip, select .... From edit menu.
6. To export an udio clip , select export from .... menu.
7. To add the impact (Echo) to the clip of the sound, open .... menu.

Question 7: complete the following sentences:

(Effect menu – homepage – texts – reversal – static web pages)

1. The impact of .... Reflects the beginning with end of the clip.
2. To add the impact (reverse) to the clip sound, select ....
3. Use of HTML commands in the design of ....
4. .... the main page of website, through which is going for the rest of the webpages.
5. .... From webpages elements.

Question 8: match

A	B
1- Audacity program supports the extension	a- video
2- webpages display information to view only	b- planning to build the site
3- webpages elements	c- WAV , MP3
4- 4-The first stage of design and create a website	d- Images, text and audio
5- Is a set of fixed shots	e- Static web page
